931 Craftsman Road, Norristown, PA 19403 | (610)-539-3031 | danrgood@gmail.com

JavaScript Developer

Recent college computer science graduate with broad skills in programming and development. Seeking entry-level programming opportunity with a progressive, growing organization. Strong work ethic. Oriented towards logic and the front-end. Detail-driven; meticulous and productive.

SOFTWARE SKILLS

- JavaScript, Angular
- Java
- HTML5, CSS3, Twitter Bootstrap
- Git
- Windows, Linux

EDUCATION

WEST CHESTER UNIVERSITY OF PENNSYLVANIA, West Chester, PA August 2013

Bachelor of Science, Major: Computer Science

- GPA: 3.1
- *Relevant Coursework:* Computer Security 2, Database Management Systems, Visual Programming, Artificial Intelligence, Business Writing, and Intro to Communications

ACCOMPLISHMENTS

Research and Programming

- Wrote a research paper on Electronic Signatures which included digital signatures and biometric signatures, and it considered Electronic Signatures from a standpoint of security.
- Designed and implemented save slot functionality in an angular 1.x program. On save, object is saved to the designated spot in the localStorage save array. Transitioned it to angular 2 as part of a larger project.
- Implemented a program that allows operations on numbers with more than 15 digits in JavaScript. Numbers are stored in an array, and it performs addition, subtraction, multiplication, division, and modulus.
- Designed a grammar for a parser in Lisp. With grammar, parser, and lexicon had sentences tested to see if they are semantically correct.

Communication and Collaboration

- Researched and Presented with group on Extreme programming.
- Took Business Writing and Public Speaking.
- Worked in small group to create a gradebook with a Java interface and a SQL database. Manipulated SQL databases based on user input. Communicated on frequent basis and combined code with team members.
